PAVLO POPOVYCH

Data Analyst | Manufacturing, Logistics & Operations

+421 949 331 289 | pavlo.v.popovych@outlook.com | Portfolio Website | GitHub | LinkedIn | Slovakia, EU

PROFESSIONAL SUMMARY

Data Analyst with 1.5+ years of on-site experience in electronics manufacturing, with a strong interest in manufacturing, logistics, and operations analytics. Skilled in Python (Pandas, Matplotlib, Scikit-learn), SQL, and Power BI, with hands-on experience in data wrangling, exploratory analysis, visualization, and predictive modeling. Certified in IBM Data Science and DeepLearning.AI Machine Learning, with a portfolio of end-to-end projects.

PROFESSIONAL EXPERIENCE

Production Data Analysis & Supervisor Assistant | Foxconn | Mar 2023 – Oct 2024

- **Performance Optimization:** Collected and analyzed production defect data using **Python** to identify critical quality issues, high scrap-rate models, and associated financial losses. Presented findings to the PD Manager, enabling targeted quality controls, directly resulting in a **~3% increase in line pass rate** of specific models **and a ~5% reduction in scrap storage** requirements on the PD area.
- **Process Automation:** Engineered **Excel VBA** scripts to automate KPI reporting and training matrices, reducing data preparation time by **~80%** and sparing time for higher-priority tasks. Prepared technical documentation for the scripts.
- **Data Governance:** Developed **standardized templates** for production data collection, ensuring integrity for trend analysis.
- **Inventory Analytics:** Managed and analyzed inventory and initiated purchase requisitions to maintain operations.

Quality Operator | Foxconn | Jan 2023 – Mar 2023

- **Root Cause Analysis:** Managed supplier complaints by performing deep analysis on hundreds of defective units; documented findings in **Excel** and coordinated RMAs with the warehouse to **recover financial losses** of the company.
- **KPI Tracking:** Generated daily **First Pass Yield (FPY)** reports from testing logs to monitor production line performance.
- **SOP Standardization:** Translated several SOPs (English --> Russian).

KEY PROJECTS

Customer RFM Segmentation | Python, SQL, Scikit-learn, Power BI | GitHub | Jan 2026 – Mar 2026

- Built an end-to-end customer segmentation pipeline, computing **RFM** in **SQL** and performing **EDA** with **Pandas**.
- Applied K-Means clustering using **Scikit-learn** to identify high-value and at-risk customer segments.
- Visualized RFM segments in **Power BI** to provide actionable insights for customer lifecycle management.

Telecom Churn Prediction | Python, Scikit-learn, Power BI | GitHub | Dec 2025 – Feb 2026

- Engineered features, processed data, and performed **EDA** using **Pandas** to identify top churn drivers for targeted retention.
- Built **machine learning** churn prediction models achieving ROC-AUC 0.84 to automatically identify high-risk customers.
- Developed an interactive **Power BI** dashboard to visualize key drivers and prioritize high-risk customers efficiently.

Supply Chain Demand Forecasting | Python, SQL, Scikit-learn | GitHub | Mar 2026 – Present

- Building forecasting pipeline using **SQL** for data extraction and **Python** for SKU-level demand analysis and prediction.

Small Business Sales Analytics Platform | Python, SQL | Short Summary | Feb 2025 – Jun 2025

- Designed and deployed a **PostgreSQL** database with an automated **ETL** pipeline to ingest local transaction data.
- Analyzed sales with **Pandas** to identify top SKUs and demand trends; synthesized insights to reallocate capital from stagnant products to high-demand categories and reduced dead stock by **~20%**, improving inventory turnover.

Collection of EDA Projects | Python, SQL, Power BI | GitHub | Always Ongoing

- Conducted exploratory data analysis across diverse datasets using Python, Pandas, SQL, and visualization libraries to clean data, uncover trends, identify anomalies, and generate actionable plans & insights.
- Developed interactive Power BI dashboards for some EDAs to visualize and present key findings.

EDUCATION & CERTIFICATIONS

- IBM Data Science Professional Certificate | Coursera | Sep 2025 – Feb 2026
- Microsoft Power BI Professional Certificate | Coursera | Feb 2026 – Present
- DeepLearning.AI Machine Learning Specialization | Coursera | Apr 2025 – Jul 2025
- Junior Bachelor's in Computer Engineering | EQF Level 5 – Short-cycle Higher Education | Sep 2022 – Jul 2025

SKILLS & TOOLS

- **Technical Core:** Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL (Joins, CTEs, Window Functions)
- **Other Tools:** Power BI, Excel (PivotTables/Power Query), dbt, Git, Linux, VBA
- **Methods:** Descriptive & Inferential Statistics, A/B Testing, Hypothesis Testing, Predictive Modeling
- **Languages:** English (C1 – Advanced), Russian (Native), Ukrainian (Native), Slovak (A2 – Basic)
